

Scaglia Indeva

A worldwide network at your service

A reliable Company with a long history

The ant is a tireless and intelligent worker. It is able to lift and carry with ease loads much larger than itself. This simple analogy represents Scaglia Indeva's mission to design and produce industrial manipulators that are compact yet strong, simple yet intelligent, and offer improved performance whilst reducing the risk of injury and improving workforce wellbeing.

A world-leading manufacturing company in the field of material handling and intra-logistics.

Since 1838 this family-owned company has been at the forefront of manufacturing and is now an important industrial group with diverse business interests worldwide.

Since 1970 Scaglia Indeva has been at the leading edge of design and manufacture of innovative, ergonomically designed industrial manipulators that are used by major global manufacturers in varied applications throughout the world.

World-wide, Scaglia Indeva works with many blue-chip manufacturers across most sectors, including the leading automotive companies, where innovative and reliable material handling solutions are required. Our headquarters are in Val Brembilla - Italy. Our key locations offer a central sales and support operation, which provides excellent engineering services and supply of spare parts.

Scaglia Indeva Intelligent Material Handling Technology

The Liftronic® Series, known as INDEVA® is a new generation of advanced industrial manipulators featuring electronic control. They represent the evolution from traditional manipulators and are part of the innovative product group of load handling devices known as **Intelligent Assist Devices.**

This series is equipped with an **advanced electronic control system** which overcomes the control limitations of pneumatic manipulators. They provide truly ergonomic and effortless handling.

The INDEVA® Liftronic® series offers numerous important and unique advantages over a traditional pneumatic manipulator, especially the auto-weight sense and auto balancing features:

- **Higher productivity:** using an INDEVA®, output can be maintained throughout a full shift giving increased productivity and operator wellbeing.
- Better ergonomics: a fingertip-sensitive handle allows for the lifting or lowering of heavy loads by simply touching the handle with a finger. Very little human effort is required during any part of the lift, place and lower process.
- **Higher precision:** with considerably more speed and precision than a traditional pneumatic manipulator, an INDEVA® allows for unsurpassed precision, where the operator will intuitively work at the pace best suited to the task. The operator has exceptional control with the lightest of touch needed.
- User friendly: the auto weight sensing and auto balancing functions operate in real time, so no need to pre-set the load or to keep buttons depressed. The **Float Mode** option allows the operator to control movement directly from the load.
- Safety: state-of-the-art safety features prevent movement unless an operator is present and in control. Should a power failure occur, the motor is held with a mechanical lock and the load cannot be released until power is restored, or the full weight of the load is supported.
- Wireless connectivity for industry 4.0: an INDEVA® can exchange data with the Customer IT System through the Company Network and allows visualisation of manipulator activity by means of interface software.
- Remote trouble shooting: an INDEVA® can be connected via Wi-Fi to **App Indeva**, so that machine data can be transferred to a remote tablet or smartphone in real time. This can assist fault diagnosis, so significantly reducing call-out charges and operator downtime.
- Environment friendly: low carbon foot print thanks to efficient and low energy consumption.

In applications which require speed of handling, smooth movement and precise load placement, the INDEVAs Liftronic® Series provide a perfect solution.

A recent case study by the Engineering Faculty of the Brescia University and published by the International Journal of Industrial Ergonomics, together with a comparison study carried out by the University of Milan proved how the use of an INDEVA® satisfies current industry demand for increased productivity combined with improved ergonomics and safety.

Scaglia Indeva Manipulators range

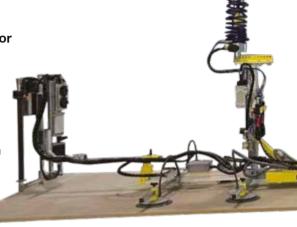

Liftronic® Series

Intelligent Devices for Handling

Electronic control

The Liftronic® Series Intelligent Devices for Handling, known as INDEVA®, represent true evolution of traditional industrial manipulators.

State-of-the-art standardised components, combined with cutting-edge technology, hardware and optimised software provide a **high degree of safety and reliability**.

Automatic weight sensing in real time.

AUTO-WEIGHT SENSE

No weight sensing.

Automatic weight balancing in real time allowing variable weights to be handled without presetting load.

> AUTO BALANCING

Weight balancing is not automatic or real time. Pre-set weights via selector switch.

Moves as fast or as slow as the operator decides using fingertip control with minimal effort and instant response.

RESPONSIVENESS

System response is slower and feels heavier because of this, especially with upward movement

PN Series

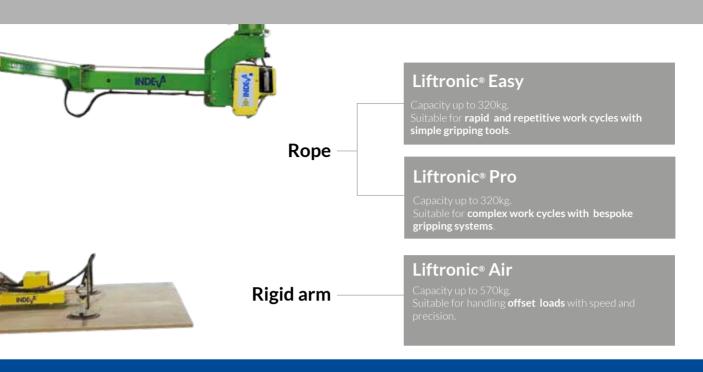

Traditional Industrial Manipulators

Pneumatic control

PN series manipulators are traditional industrial manipulators featuring pneumatic control and drive.

All manipulators in the PN Series can be designed in accordance with ATEX regulations as per EU Directives 2014/34 regarding applications in controlled environments with danger of explosion, classified classes 1 and 2 (Gas) (only for PN Flex) and 21 and 22 – Dust (for all PN series models).

Precise and coordinated with fine adjustment allowing accurate placement so reducing the risk of damage.

LOAD PLACEMENT

Some resistance is felt as air enters and leaves the cylinders so restricting natural speed of movement.

Lower: a comparative study showed that the CO² output and total running cost of an INDEVA® is around only 12,5% that of a pneumatic manipulator.

> CARBON FOOTPRINT & TOTAL COST OF OPERATION

Higher: a comparative study showed that the CO² output and total running cost of a pneumatic manipulator is around 8 times that

Rigid arm

Light and compact structure allows great visibility and ease of maneuverability.

MANEUVERABILITY

System requires heavier and bulkier structure so reducing visibility and maneuverability.

Comprehensive auto - diagnostic software and remote trouble shooting with App-Indeva or INDEVA® Gateway.

DIAGNOSTIC &
REMOTE TROUBLE
SHOOTING

Check and diagnosis by expert technician attending site. Remote trouble shooting is not available. Simple and efficient: by means of display.

MAN/MACHINE INTERFACE

Restricted options to identify faults at the machine.

Rope — PN Flex Capacity up to 160kg.

PN Ergo

Capacity up to 570kg. Suitable for handling **offset loads**.

PN Compatto

Capacity up to 100kg.

Suitable for handling offset loads in a small work area.

PN Zip

Capacity up to 80kg. /ery compact structure suitable when a **short vertica** t**roke** is required

Liftronic® Easy Intelligent Device for Handling

Liftronic® Easy is an INDEVA® - Intelligent Device for Handling. Suitable for rapid and repetitive work cycles with **simple gripping tools**.

Main features

- Auto-weight sense and auto-balancing
- Can be integrated with App-Indeva and INDEVA® Gateway
- Unparalleled safety
- Ergonomic design
- Simple gripping devices
- Compact and light
- Fast, responsive and precise
- Low carbon footprint

INDEVA® **Gripping tools**

TECHNICAL DATA

(weight of lifting tool included)

Power supply: 110/230 V-AC - 50/60 Hz

Power consumption: max 700 VA

Enclosure protection: 54 IP

Vertical stroke: up to 2.80m

INDEVA® Modulo Make your own gripping tool

Liftronic® Series

INDEVA® Modulo is a standard component range for assembling a gripping tool which is to be attached to a Liftronic® Easy tool head.

It is easy for customers to design the tool to best suit their needs and then purchase the necessary parts.

These standardised modules have been proven over many years and are a key part of our continuous improvement and development program.

I-Connect

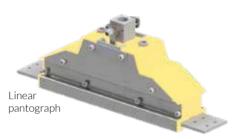

Standard I.O. Interface module: you can easily implement safety functions for your own custom gripping tool

Gripping Modules

These chucks can be fitted with jaws according to your specific requirements

Machine/Operator Interfaces

Remote touch sensitive handle available in different lengths

Accessories

Air and electric connections via a continuous swivel joint at the toolhead to keep cables from tangling

Liftronic® Pro Intelligent Device for Handling

Liftronic® Pro is an INDEVA® - Intelligent Device for Handling. It is used for complex applications with bespoke gripping systems.

Main features

- Auto-weight sense and auto-balancing
- Can be integrated with App-Indeva and INDEVA® Gateway
- Unparalleled safety
- Ergonomic design
- Bespoke gripping devices
- Compact and light
- Fast, responsive and precise
- Low carbon footprint

INDEVA® **Gripping tools**

TECHNICAL DATA

Max. gross capacity: from 80 to 320kg (weight of lifting tool included)

Power supply: 110/230 V-AC - 50

Power consumption: max 700 VA

Vertical stroke: up to 2.80m

Industry 4.0 ready

App-Indeva

Is a virtual INDEVA® service engineer always at disposal to the INDEVA® technician providing machine data capture and analysis, diagnostic and real time trouble shooting.

App-Indeva, is based on an in-house designed App suitable for Android smartphone or tablet that can be connected via Wi-Fi to the lift assistor, features **real-time capability to collect and analyse machine data** and deliver the results to the INDEVA® technician and to a **remote Indeva Service Centre**.

If you are using an INDEVA $^{\otimes}$ manipulator equipped with App-Indeva you will increase your machine availability time through:

- reduced time for diagnosis and trouble shooting by the INDEVA® technician
- reduced time for communication with an INDEVA® service centre

INDEVA® Gateway

Allows real time data exchange with the Customer IT System through the Company Wi-Fi network and allows visualisation of production data by means of an interface software.

Liftronic® Pro & Easy Versions

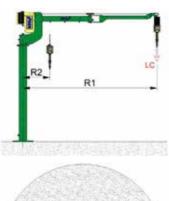

Articulated Arms

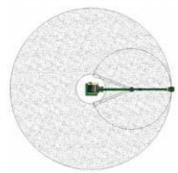

2 JOINT ARMS

Standard arms featuring 2 joint articulation.

STRUCTURE	R1 (m)	2.5	3	3.5	4	4.5
L= Light	LC kg R2 (mm)	80 450	60 550	40 650	-	1 1
H= Heavy	LC kg R2 (mm)	260 630	190 760	140 880	105 1020	78 1140
X= Extra	LC kg R2 (mm)	-	320 860	320 1005	280 1150	220 1300

LC= max load capacity; R2= dead area

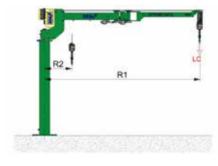

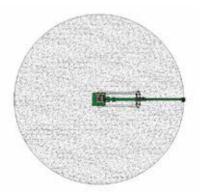

3 JOINT ARMS

The INDEVA® Orbit Arm3 is a 3 joint arm available on request for both column and overhead versions with capacities up to 145 kg (including tooling). The 3 joint Arm provides **increased coverage** within the radius of the arm and offers the operator smooth, controllable movement across the full radius with the added benefit of **quick sideways movement** using the forearm only.

STRUCTURE	R1 (m)	2.75	3.25	3.75	4.25	4.5
L= Light	LC kg R2 (mm)	-	-	-	-

Liftronic® Air Intelligent Device for Handling

Pneumatic drive - electronic control

The world's first manipulator with the strength of a traditional pneumatic manipulator and the intelligence of an INDEVA®.

It offers electronically controlled air and load management, delivering precise, energy efficient handling and auto weight sensing, removing the responsibility from the operator to make adjustments for different weights by utilising our touch sensitive handle technology.

It is suitable for handling offset and/or very heavy loads with minimum effort.

Liftronic® Air units can be supplied either column, ceiling or overhead rail mounted.

Compared to traditional pneumatically controlled manipulators, Liftronic® Air offers important advantages which help improve safety, ergonomics, productivity and the Environment.

Main features

- Efficient use and delivery of air
- Auto-weight sense and auto-balancing
- Unparalleled safety
- Fast, responsive and precise
- Low carbon footprint

STANDARD MODELS		LIFTRONIC AIR
